

Academic Search Engine User's Guide

You can access all the e-resources subscribed to by our library and our printed catalog from one entry point.

Search-Access On All Sources

The image shows a library search interface. At the top, there are three navigation tabs: "ALL RESOURCES" (grey), "CATALOG" (teal), and "E-JOURNAL SEARCH (A to Z)" (teal). Below the tabs is a search box with the text "Search All Resources in Our Library" inside it. To the right of the search box is a dark grey button labeled "Search". Below the search box is a yellow bar containing four links: "Advanced Search", "Help", "Subscribed Databases", and "Ekual - Ulakbim Databases".

On our library homepage (<http://www.kutuphane.hitit.edu.tr/>) enter your terms in the search box and start searching all the resources that our library provides you at the same time.

Important Note: in order to gain access to resources, you must be on the University internet network or have off-campus access settings (http://cdn.hitit.edu.tr/kutuphane/files/20460_1810031413560.pdf) you must have done.

[managers](#)
[polls and surveys](#)

Özet: Recent years have seen a reemergence of interest in **artificial intelligence** (AI) among both managers and academics. Driven by technological advances and public interest, AI is considered by some as an unprecedented revolutionary technology with the potential to transform humanity. But, at this stage, managers are left with little empirical advice on how to prepare and use AI in their firm's operations. Based on case studies and the results of two global surveys among senior managers across industries, this article shows that AI is typically implemented and used with other advanced digital technologies in firms' digital transformation projects. The digital transformation projects in which AI is deployed are mostly in support of firms' existing businesses, thereby demystifying some of the transformative claims made about AI. This article then presents a framework for successfully implementing AI in the context of digital transformation, offering specific guidance in the areas of data, **intelligence**, being grounded, integrated, teaming, agility, and leadership.
