

MENDELEY

- Mendeley nedir?
- Kütüphanenizi oluřturun
- Belgelerinizin ve referanslarınızın yönetimi
- Referanslara alıntı yapılması ve paylaşılması

Mendeley nedir?

Mendeley makalelerinizin yönetmek, paylaşmak, okumak, notlar almak ve alıntı yapmak için kullanabileceğiniz ücretsiz yazılımdır.

Aynı zamanda makalelerinizi çevrimiçi yönetebileceğiniz, yeni trendleri ve istatistikleri keşfedebileceğiniz ve benzer konularda çalışan araştırmacılarla iletişim kurabileceğiniz bir araştırma ağıdır.

The screenshot shows the Mendeley Desktop application window. The interface includes a menu bar (File, Edit, View, Tools, Help), a toolbar with icons for adding, deleting, and syncing documents, and a search bar. The main area is divided into three panes: a left sidebar for library management, a central document list, and a right pane for document details.

**Koleksiyonunuzu kurun ve yönetin**

**Etiketler ve notlar ekleyin ve belge bilgilerini düzenleyin**

**Bütün belgelerinizi gösteren kütüphane (alıntı veya tablo görünümü)**

**Makaleleri yazar, anahtar kelime, etiketler veya yayınlara göre filtreleyin**

The document list in the center pane shows a table with columns: Authors, Title, Year, Published In, and Added. The details pane on the right shows fields for Type, Title, Authors, Journal, Volume, Issue, DOI, and Files.

Kütüphanenizi oluřturma

**Kütüphanenizi oluşturmak için farklı seçenekleriniz var:**

- Tek dosya veya klasörün tamamını ekleyin
- Bir klasörü takip ederek PDF dosyalarını otomatik içe aktarın
- Mevcut EndNote/BibTeX/RIS veritabanlarını ekleyin veya

**...kütüphane paneline PDF dosyalarını sürükleyip bırakın**

**... ve Mendeley kendiliğinden belge detaylarını ayıklamaya çalışacak.**

The screenshot shows the Mendeley Desktop interface. On the left, there is a list of documents with columns for Year, Published In, and Added. The selected document is 'An empirical test of inventory, service and cost benefits from a postponement strategy' by Davila, Tony and Wouters, Marc, published in the International Journal of Production Research in 2007. On the right, the 'Document Details' tab is active, showing the following information:

- Type: Journal Article
- Title: An empirical test of inventory, service and cost benefits from a postponement strategy
- Authors: Davila, Tony; Wouters, Marc
- Journal: International Journal of Production Research
- Volume: 45
- Issue: 10
- Pages: 2245-2267
- Year: 2007
- URL: <http://www.informaworld.com/openurl?genre=article&doi=10.1080/00207540600725002&magic=crossref|D=404A21C588053405B1A640AFFD44AE3>
- DOI: 10.1080/00207540600725002
- ArXiv ID:
- PMID:
- Keywords: empirical research; postponement; product variety; supply chain
- Files: 24904834.pdf

(Crossref, PubMed, ArXiv or Google Scholar) gibi çeşitli veritabanlarını sorgulayarak belge detaylarını tamamlamayı deneyebilirsiniz.

DOI, PubMed veya ArXiv ID bilgilerini girip büyüteç basarak da aratabilirsiniz

The right-hand pane shows the details for the selected document:

- Type: Journal Article
- Title: Comparison of Quality Management Practices: Across the Supply Chain and Industries
- Authors: Choi, Thomas K; Rungtusanatham, Manu
- Journal: The Journal of Supply Chain Management
- Volume: 35
- Issue: 1
- Pages: 20-27
- Year: 1999
- URL: <http://www.blackwell-synergy.com/doi/abs/10.1111/j.1745-493X.1999.tb00052.x>  
[Visit www.blackwell-synergy.com](http://www.blackwell-synergy.com)
- DOI: 10.1111/j.1745-493X.1999.tb00052.x
- ArXiv ID:
- PMID:
- Keywords: Author-supplied keywords
- Files: out.pdf

Buttons for "Add" and "Remove" are visible at the bottom of the details pane.

The screenshot displays the Mendeley Desktop application interface. At the top, there is a menu bar (File, Edit, View, Tools, Help) and a toolbar with various icons for navigation and editing. A search bar in the top right corner contains the text "strategy". Below the toolbar, the main window shows a PDF document titled "A taxonomy for selecting global supply chain strategies". The document content includes the title, authors (Martin Christopher, Helen Peck, Denis Towill), and an abstract section. The abstract text is as follows:

**Abstract**  
**Purpose** - The purpose of this paper is to address the increasingly important question of supply chain design for global operations. With the rise of off-shore sourcing and the simultaneous need for improved responsiveness to customer demand, the choice of supply chain **strategy** is critical.  
**Design/methodology/approach** - The paper draws its conclusions from case-based research supported by survey data.  
**Findings** - The paper provides evidence that the choice of supply chain **strategy** should be based upon a careful analysis of the demand/supply characteristics of the various product/markets served by a company. It presents the basis for a taxonomy of appropriate supply chain strategies.  
**Research limitations/implications** - The case studies and empirical research reported in this paper are specific to the clothing manufacturing and fashion industries and there would be benefit in extending the research into other sectors.  
**Practical implications** - Given the increasing trend to out-sourcing and off-shore sourcing, the choice of supply chain strategy is of some significance and clearly impacts competitive performance.  
**Originality/value** - Whilst there is a growing recognition of the need to match the supply chain to the market, there is still limited research into what criteria should be utilised to aid the choice of supply chain strategy. This paper attempts to extend our understanding of the issues.  
**Keywords** Sourcing, Lean production, Agile production, Supply chain management  
**Paper type** Research paper

On the right side of the application, there is a sidebar with tabs for "Tags & Notes", "Document Details", and "References". The "Tags & Notes" tab is active, showing fields for "Abstract:", "Tags:", and "Notes:". The "Notes" field contains a rich text editor with icons for bold, italic, underline, and list creation.

At the bottom left of the window, it says "Page 1 of 12".

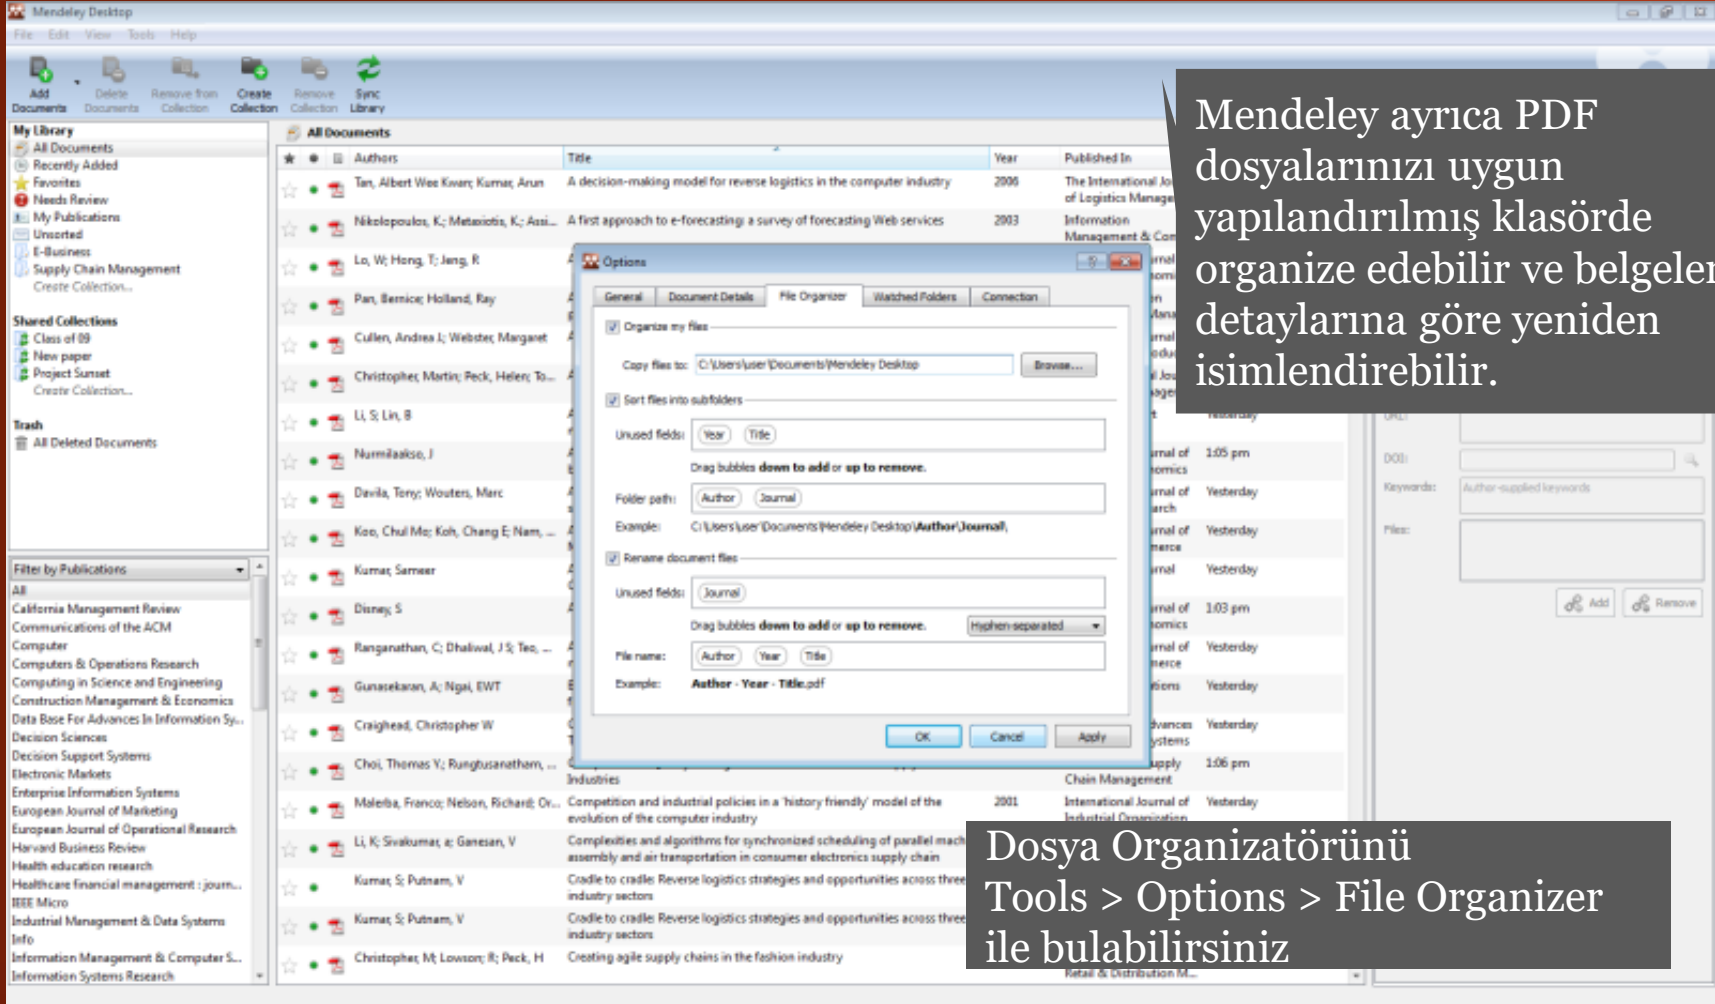

The screenshot shows the Mendeley Desktop application window. The main pane displays a document titled "A taxonomy for selecting global supply chain strategies" by Martin Christopher, Helen Peck, and Denis Towill. The document is from the Emerald journal, "The International Journal of Logistics Management", Vol. 17 No. 1, 2008, pp. 277-297. The page number 277 is visible in the top right corner of the document area.

Annotations are visible in the left margin of the document, including a yellow highlight on the abstract and several notes. One note reads: "This is a note" with a timestamp of "07.07.2009 14:04:22". Another note says "This is a note" with a timestamp of "07.07.2009 14:04:22". A third note says "This is a note" with a timestamp of "07.07.2009 14:04:22".

The right-hand pane shows the "Tags & Notes" section, which includes fields for "Abstract:", "Tags:", and "Notes:". The "Notes" section contains a yellow highlight with the text "This is a note" and a timestamp of "07.07.2009 14:04:22".

The bottom left corner of the window displays "Page 1 of 12".

**Biographical Information**

Jason Hoyt is the Research Director at Mendeley. He holds a PhD in Genetics from Stanford University where he was awarded the Ruth L. Kirschstein NIH predoctoral fellowship from 2002-2007.

Prior to joining Mendeley, he worked under Michele Calos studying translational research into human gene therapy. He developed new methods for non-viral gene delivery into mouse hematopoietic cells using the phiC31 integrase. Additionally, he used directed evolution to evolve phiC31, such that integration would occur at single location in the human genome, thus reducing potential side-effects. Also amongst his direct research advisors at Stanford were Gavin Sherlock, Anne Brunet, and Andrew Fire: 2006 Nobel Laureate in Medicine or Physiology.

While a graduate student at Stanford, Jason saw the need and opportunity to improve collaborative research through modern Internet technologies. This resulted in founding Ologeez.org (peer-review literature search,

**Abstract**

Many scientists now manage the bulk of their bibliographic information electronically, thereby organizing their publications and citation material from digital libraries. However, a library has been described as "thought in cold storage," and unfortunately many digital libraries can be cold, impersonal, isolated, and inaccessible places. In this Review, we discuss the current chilly state of digital libraries for the computational biologist, including PubMed, IEEE Xplore, the ACM digital library, ISI Web of Knowledge, Scopus, Citeseer, arXiv, DBLP, and Google Scholar. We illustrate the current process of using these libraries with a typical workflow, and highlight problems with managing data and metadata using URIs. We then examine a range of new applications such as Zotero, Mendeley, Mendeley Papers, Mendeley, CiteULike, Connotea, and HubMed that exploit the Web to make these digital libraries more personal, sociable, integrated, and accessible places. We conclude with how these applications may begin to help achieve a digital defrost, and discuss some of the issues that will help or hinder this in terms of making libraries on the Web warmer places in the future, becoming resources that are considerably more useful to both humans and machines.
